NAGLEDNA+
Trakia 7, Asenovgrad
10.5. – 30.6.2015

What is the preparation before a flight? How to overcome fear and build a flying intuition? What is the flight structure and where is the connection between mind energy and the wings' power? Can the inner world predestine the flying yearning? How to reach the balance mind – range –flight? The exhibition “Preflight” organized by Nagledna Plus will seek answers to all these questions.

The exhibition will be followed by a talk on the subject when the viewers will share their understanding of flight and its preparation judging from their own experience and knowledge.

Besides the display, the guests can see the latest books of the studio's collection which study the illustrative point of view of the art of flying.

The illustrations in the books are a perfect overview of the ancient and modern techniques of this art, valid and available for all those people craving for flying.
